

On the evening of Monday, May 19th, an affinity group from the River City took to the neighborhoods, and more specifically the houses of executives and contractors of Gohmann Asphalt and Construction, Inc. Gohmann Asphalt and Construction, Inc. is a disgusting company that has decided to proceed with business in the construction of Interstate-69 (I-69) which is the North American Free Trade Agreement's (NAFTA) superhighway.

NAFTA's superhighway has already been built from Ontario to Indianapolis. It is planned to extend into Kentucky, Tennessee, Mississippi, Arkansas, Louisiana and Texas. Once in Texas it would connect with the highways of the Plan Puebla Panama into Mexico. I-69's Section 1, from River City (otherwise known as Evansville, IN) to Bloomington, IN, is set for construction in spring and summer of 2008. With over 400 people that will be evicted, 7,000 acres of land that will be paved over, communities across the Turtle Island (otherwise known as North America) that will be destroyed, the murder of countless animals, including native Indiana bats being killed off, people of the River City area could no longer remain idle.
